Halloween and the Establishment Clause

The endorsement of religion in public schools often arises as a point of controversy. While some would consider that Halloween is far from being a religious celebration, this presumption has been challenged in several cases.

Find a legal encyclopedia entry which provides details into a case in which the court held that the depiction of Halloween images (e.g., witches and brooms) does not violate the Establishment Clause by endorsing or promoting religion. Provide citations for the encyclopedia article AND the case cited.

Beware of trick or treaters

Halloween night is filled with ghosts, goblins and trick or treating. But is it safe to open the door to anybody who rings? In one California case, a woman opened the door to a “trick or treater” who pushed her to the ground, ran into the house, and stole some of her jewelry before being apprehended by the police. The court sentenced defendant to a prison term and fine for robbery. Provide the name of the court (including district and division) that decided this case. Which 1963 United States Supreme Court Case is cited *within* the decision you just found?
